Teeth Whitening

Your journey to a whiter, brighter smile starts here. We use Boutique Whitening which is a premium quality whitening gel that delivers superior results, with a noticeable improvement in just a few days. Boutique Whitening has been designed to fit in with your lifestyle. Now you can whiten your teeth, your way.

Teeth Straightening (Clear/fixed Braces)

A great smile can improve your appearance and your confidence. But the benefits of straight teeth aren't just about looks. When teeth don't align properly, it's called malocclusion. This can make it harder to chew, wear down your enamel, accelerate tooth decay, make you look older, and even cause serious long-term damage. Our dentists at 8to8 Dental provide different types of teeth straightening from clear braces to fixed braces. Book in for a consultation for more information.

Dental Implants

Losing a tooth or teeth can affect the way you talk, eat and even the way you look. Plus, your self-confidence can take a real knock. A dental implant is a titanium screw that's placed directly into your jawbone, replacing your missing tooth root. They are a long-term solution to replace one or more missing teeth. At 8to8 Dental, our highly skilled implant dentists have vast experience placing lots of implants in different challenging conditions.

Facial Aesthetics (Antiwrinkle Treatment)

Lines and wrinkles are an inevitable part of the ageing process. These can be particularly noticeable around the eyes, mouth, and forehead. Facial aesthetics are non-surgical, cosmetic procedures that can help you revitalise your appearances, enhance the shape of your lips or give your cheeks more definition and help reduce the appearance of lines and wrinkles. It can also add volume and smooth your skin, subtly refreshing your appearances or add symmetry to your appearance by making small adjustments to certain areas of your face.

Sedation

Lots of adults have a fear of the dentist and some suffered from extreme dental anxiety. So, if it's something that affects you, you're not alone.

But being a nervous patient shouldn't get in the way of your dental health. Dental sedation is a way of making you feel more at ease during treatment. It doesn't put you to sleep like a general anaesthetic; you're still conscious and able to talk with your dentist. Instead, it puts you into a deeply relaxed state, where you won't feel any discomfort or pain.

If you're nervous about seeing the dentist, please contact your local 8to8 dental branch and tell the reception staff about your concerns. We have the tools and experience to help you overcome your anxiety.
